I'm writing in support of Docket #07-16, and I ask you to provide M2Z Networks with the national spectrum license it needs to create a free, fast and family-friendly wireless broadband network. If more Americans are able to easily access fast and reliable internet service, then I believe they will be able to shop online and find new businesses and services for their use.

As the long time General Manager and now Commercial Sales Manager of Sharrett, Inc., I know that small businesses will positively benefit from this tremendous opportunity, if allowed. Nationally, online sales account for billions of dollars each quarter, and if more people have free and reliable access to the Internet, I believe those sales will increase, to the benefit of small businesses that can utilize the Internet.

I urge you to support Docket #07-16 and bring free, fast wireless broadband Internet access to millions of Americans and businesses that otherwise cannot afford these services. The sales made online have a positive impact on the economy and increasing online access will improve the already sizable results. Thank you for your consideration and time.

Sincerely,

Joe Yungwirth
Commercial Sales Manager

Re: Docket #07-16 to provide fast, free, family-friendly wireless broadband internet access

Dear Secretary Dortch,

Consumers demand more from the internet and from the businesses they use for products and services. Without broadband internet access, a small business falls behind in meeting those demands. I believe that making broadband access more widely available is to the benefit of the economy as a whole.

In order to successfully run Widener Writing & Consulting, I need to be able to quickly get information to and from my clients. It is vital that I have fast and reliable internet access. It is difficult, however, to juggle the high cost of internet access with all of my other expenses. It is even harder for those small businesses starting out or in rural locations where internet access isn't even available.

Only 35 percent of small and independent businesses have websites, which means many businesses are not using the resources the internet offers for marketing, e-commerce and communication. Businesses that now have to choose whether or not they should expend resources for broadband internet may have a better option available. If the M2Z Networks proposal is passed, then all Americans will be able to access the Internet. With this savings, businesses will have more resources to use on other necessary expenses and will be able to grow and expand and contribute greatly to the American economy.

This proposal for fast, free wireless broadband internet access, along with the optional services, will allow small businesses to access the necessary resources to expand and compete. I urge you to pass this proposal and make fast, free, wireless broadband internet access more widely available.

Sincerely,

Tina Widener
President
